DETAILED ACTION

1. This Office Action is the answer to the telephonic interview conference on 5/12/06, and amendment received on 5/16/06.

Status of the claims

2. Claims 1-10, and 21-30 are pending.

Drawings

3. Formal drawings (in 11 pages) were acceptable by the examiner on 6/25/03.

Allowable Subject Matter & Reasons for Allowance

4. Independent claim 1 is patentable over closest references of Airey in combination with Keller because they do not anticipate nor fairly and reasonably teach a programmable robotic apparatus, besides other limitations, comprising:
 - a control module in electrical communication with said drive system, said control module configured to command the operation of each tread; and an electronic compass module that response only to directional magnetic Earth (not from GPS), said electronic compass module in electrical communication with said control module, said compass module configured to discern an orientation of said programmable robotic apparatus, wherein said electronic compass module is configured to discern an orientation relative to the magnetic field of the planet Earth based on an analysis of at least one directional component of said magnetic field.

This is not an obvious invention against a combination of Keller's invention with Airey's directional components because Keller uses GPS as a navigation system, the signal broadcast by a GPS satellite as Keller's disclosure does not involve directional

components of Earth magnetic fields; that signal is not responsive to a magnetic field, and operate acceptably in the absence of a magnetic field (i.e., for a lawn-mower robot).

5. Dependent claims 2-10, and 21-30 are allowed because they are dependent on independent claim 1.

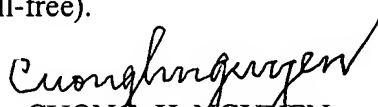

Conclusion

6. Claims 1-10, and 21-30 are patentable. Claims 21-30 are renumbered as claims 11-20 (in that order).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to CUONG H. NGUYEN whose telephone number is 571-272-6759. The examiner can normally be reached on 9:30 am - 5:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, THOMAS G. BLACK can be reached on 571-272-6956. The Rightfax number for the organization where this application is assigned is 571-273-6956.
